Summary

M.Sc. Computer Engineering student at Politecnico di Torino, building full-stack web applications in **TypeScript, React, Next.js**, and **Node.js/Express**. Experienced in taking team projects through the full development cycle — from **UML use-case modeling** and **REST API design** to layered architecture, extensive **automated testing**, and **Docker**/CI-CD deployment. Thesis research evaluates **SOLID principles for LLM-driven software maintenance**. Seeking an internship or junior role where I can contribute to production systems and grow as an engineer.

Skills & Languages

Frontend	HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS
Backend	Node.js, Express, REST APIs, Socket.io, NextAuth, JWT, Passport.js, bcrypt
Databases	PostgreSQL, SQLite, Prisma ORM, Sequelize
Testing	Jest, React Testing Library, Supertest — unit, integration & e2e
Design	UML, Use-Case Modeling, System Design, Deployment Diagrams
DevOps	Docker, GitHub Actions (CI/CD), Git, Postman
Languages	English (C1), Persian (Native), Italian (A2)

Experience

HUB Company

Shiraz, Iran

Web Developer / Webmaster

Feb 2021 – Sep 2023

- Owned end-to-end development and maintenance of the company's production website, managing uptime, **security hardening**, and plugin integrations.
- Improved organic search visibility by restructuring content and applying **SEO best practices**, resulting in measurable improvements in page indexing and ranking.
- Optimised site performance via **caching** and asset management, improving load times and Core Web Vitals.

Kimia College (Sharif Financial Institute) – Quantum Incubator

Iran

Intern

Sep 2020 – Dec 2021

- Supported coordination of **8+ early-stage startup teams** across structured incubation programmes, tracking milestones and facilitating **20+ mentorship and training sessions**.

Education

Politecnico di Torino

Turin, Italy

M.Sc. in Computer Engineering – Software Engineering

Oct 2023 – Dec 2026 (Expected)

- Thesis: *Evaluating SOLID Principles for LLM-Driven Software Maintenance*

Islamic Azad University, Shiraz Branch

Shiraz, Iran

B.Sc. in Computer Engineering – Software Engineering

Sep 2017 – Jul 2022

Main Projects

Participium

Politecnico di Torino | Nov 2025 – Jan 2026

- Built a full-stack civic reporting platform (team of 6) using **Next.js**, **Prisma ORM**, and **PostgreSQL**, following a 3-layer Controller–Service–Repository architecture across 10 database models.
- Implemented real-time communication via **Socket.io** and a **Telegram Bot** supporting report creation, status tracking, and push notifications.
- Delivered **108 test files** (87 unit + 21 integration) using **Jest** and **React Testing Library**, automated via **4 GitHub Actions CI/CD pipelines** with Codecov coverage reporting.
- Designed a multi-role access system (citizen, officer, maintainer, admin, external company) with **NextAuth** authentication across 6 user-facing interfaces.
- Tech Stack:** TypeScript, React, Next.js, Tailwind CSS, Prisma ORM, PostgreSQL, Socket.io, Jest, GitHub Actions, Docker

EZElectronics

Politecnico di Torino | Apr 2024 – Jul 2024

- Designed a full-stack e-commerce system (team of 4) from **UML use-case diagrams** through to a **TypeScript/Express** REST API with 5 resource routers (users, sessions, products, carts, reviews).
- Delivered a **495-test-case** suite spanning unit, DAO, controller, route, and integration layers using **Jest** and **Supertest** (white-box statement coverage).
- Implemented session-based authentication via **Passport.js** with role-based access control; containerised with **Docker**.
- Tech Stack:** TypeScript, React, Node.js, Express, SQLite, Passport.js, Jest, Supertest, Docker

Social Budget

Politecnico di Torino | Jun 2024 – Jul 2024

- Built a participatory budgeting web app with a **React/Vite** frontend and a **Node.js/Express** REST API (15+ endpoints across 5 routers) backed by **Sequelize ORM** and **SQLite**.
- Implemented a 4-phase workflow (setup → proposal → voting → results) with **JWT** authentication, **bcrypt** password hashing, and role-based access control.
- Tech Stack:** JavaScript, React, Bootstrap, Node.js, Express, Sequelize, SQLite, JWT
